

MTC1 to TC1

Welcome to the Northumberland Borders Rally, we hope you enjoy your nights sport. If you've got this far then you must have found the start easily enough and hopefully you are sitting there, pointing North, looking at the map and wondering which way you will have to go.

This first section starts off with a slightly tricky bit. You want to turn right out of the layby, and then take the second left which goes up past a house called Planetrees. Take care up here, especially if it is wet – when we were P Ring this section the owners told us about the last event that came past their house and about the car that ended up in a tree. There will be a codeboard about 300m before Planetrees so make sure you've got the timecard handy.

When you reach the end of this road, turn right at the T-Junction and head along the main road which follows the course of Hadrian's Wall. This is a nice easy bit and you should have no trouble keeping to the time schedule. There is another code board to collect just opposite Milecastle 24.

Once you've noted this codeboard you need to turn right at the next junction. This is a fairly straight bit of road as well, so we've put a third codeboard in just to make sure you don't get carried away too early in the event. Carry on straight across the crossroads and look out for the final codeboard of this section which is there to make sure you slow down before the humpback bridge which will need some caution because if you get it wrong you might overshoot the next junction where you turn left, almost back on yourself. Make sure you don't cut this too tight – there is a signpost in the middle of the turning !

Onto the final bit of the section now – about 1km along this road to TC1 (966 673) where you will hopefully arrive heading in an easterly direction.

Good Luck with the rest of the event – and don't worry – the rest of the instructions are a lot more conventional than for this section.

NB – All instructions are CRO unless specifically noted otherwise.
