

NORTHUMBERLAND BORDERS RALLY

EXAMPLE NAVIGATION

A road book issued at Signing On guides competitors around the first leg of the event, the Special Tests, and traditional 'plot 'n' bash' (PnB) style navigation is used for the leg after dark – the navigational rally.

This information is provided in sealed 'route envelopes', which competitors open at Time Controls along the way. Route Checks, in the form of car registration plates mounted vertically, and manned Passage Controls are then used to check that competitors are following the correct route.

Example navigation for each class of entrant, test diagrams and time cards can be found on the links below. Note that the PnB instructions contain map extracts so may take some time to download.

The Organisers.
